## DETAILED ACTION

### ***Specification***

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 2, and 4-12 are rejected be rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 11 are rejected because "xontolite" should read –xonotlite.

Claims 2 and 12 are rejected because it is not clear if the wood pulp is the fire starting agent or if it is an additional component added to the sustain release composite. Clarification is required. If the wood pulp is not the fire starting agent, then it as well as the bentonite clay should be introduced into the claims in such a manner that it is clear that the composite further comprises these components.

Claim 4 is rejected because it is a dependent of a rejected base claim. Also, commas should be inserted after "wax" and "spirits".

Claim 8 is rejected because there is no antecedent support for the "active agent."

Claims 9 and 10 are rejected because there is no antecedent support in claim 8 for "the cylindrical container."

Art Unit: 1714

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Noble teaches a fire starting agent comprising calcium silicate having a xonotlite structure.
